<p>Institution mentors its students with the help of a multi strata mentoring system. It starts from curriculum development in which the institution, with the help of academic bodies of the Patna University, prepares job oriented curricula and also introduced various job oriented courses like BBA, BCA Biotechnology and Functional English. These all courses are very helpful in mentoring the student's career. The Institution also works for the students of regular courses. Our learned teachers regularly discuss with their students about procedure, syllabus, eligibility, etc. of different graduation based competitive examinations. In off time our most of the teachers interact with the needy students and clear their doubts regarding university's annual examinations as well as their competitive examinations. Different departments, time to time, manage for remedial classes for slow learners. They also provide additional study materials and different types of supports to advance learners at department and personal levels. Placement cell of the college also make arrangement for placement of our students. The institution also provides moral and academic support and guidance to our pass out students.</p>

<b>CRITERION VI –GOVERNANCE, LEADERSHIP AND MANAGEMENT</b>						
<b>Criterion VI - Governance, Leadership and Management</b>						

## **6.1 Institutional Vision and Leadership**

### **6.1.1 Mention two practices of decentralization and participative management during the last year.**

The management of B. N. College consists of mainly two branches- Academic and Administrative. Academic activities of the college are managed by the Principal, Heads of the respective departments and the faculty members, while the administrative activities are governed by the Principal, Bursar, Accountant and Administrative staffs in tune with the directions of Patna University. Apart from these basic management structures of the college, several committees are formed to practice decentralization and participative management. Our college has constituted the following committees:

- Admission Committee
- Finance Committee
- Anti-Ragging Committee
- Staff-Welfare Committee
- Sports Committee
- Cultural Committee
- College Development Committee
- Purchase Committee
- Library Advisory Committee
- Examination Committee
- NAAC Committee
- Career Counselling and Campus Placement Cell
- Grievance Redressal Cell

The college management is not just run by the higher authorities but there is participation of people from all sections like teaching staff, non-teaching staff and students. Suggestions and inputs from these different groups of people play a major role in decision-making process, which is helpful for the growth of the college in all aspects. Our college also encourages the involvement of society, stakeholders, alumni and parent in its management system. The feedback from these various sections helps to improve the quality of the college.

In addition to the above, here we give two specific examples of decentralization and participative management which has been adopted by our college in the last year:

1. A few years back, there were no girls' toilets available in the college. By taking feedback from students, it has been realized that there must be a separate toilet for girls. The higher authority of our college acted promptly on this problem and a development committee was constituted to build up girls' toilets in the college campus.

2. As per the government directives, it is mandatory that college campuses should be green to promote eco-friendly environment. Our college took this government initiative as a positive feedback and started to work on the strategic plan for making a green campus. However, the major problem was the unavailability of open space within the campus. Consequently, a committee was formed and it was decided that the old staff quarters is in dilapidated condition which is of no use. Then these quarters were demolished and in place of that, massive plantation has been done. In this plantation process, the participation of teachers and students was also crucial as they brought various kinds of plants from different places.

### **6.1.2 Does the Institution have a management Information System (MIS)?**

Yes. B. N. College, Patna has its own website where information pertaining to all the academic and administrative activities are uploaded and maintained periodically. This website is particularly helpful for students as they get all the necessary information related to entrance test, final examination, registration, admission and fee payment. Our college also provides website hosted mailing facilities for all the faculty members.

Important information is displayed on main notice-board of the college as well as on departmental notice-board. For sharing information, our college also takes the help of print media and electronic media.

## **6.2 Strategy Development and Deployment**

### **6.2.1 Quality improvement strategies adopted by the institution for each of the following:**

#### **❖ Curriculum Development**

Curricula for regular courses at both undergraduate and post-graduate level are basically developed by university, but college teachers are also involved in various committees of the curriculum development. However, curriculum for vocational/self-financing courses such as BCA, BBA, Functional English and Biotechnology are developed by the college and subsequently they are adopted after approval by the University and Chancellor's office. We focus on research based and job-oriented curriculum. Different methodologies are adopted by teachers from their classroom experiences that help in modifying the curriculum. Our college also arranges seminars, conferences, workshops and hand-on-session that give an updated view of the subject matter which is then used to design the curriculum up-to-date.

#### **❖ Teaching and Learning**

Our college teachers adopt pedagogy in their classroom teaching that helps students to understand the subject matter clearly. To enhance the teaching skills of teachers, our college provides required facilities for their teachers to participate in Orientation and Refresher courses. Events like seminar, conference and workshop are periodically arranged by the college to keep students and teachers updated about the current scenario of various topics. To develop a better teaching-learning environment in the college, smart classrooms have been developed. Also, our college teachers use model and power-point presentation in their classroom teaching to make the subject matter interesting. For making teaching-learning process more effective, students are also encouraged to participate in discussions with their teachers and class fellows. Extra/Tutorial/Remedial classes are arranged for students those who perform poorly in the classroom. To assess students' performance, regular home assignments are given to them. Also, monthly tests are conducted at departmental level.

#### **❖ Examination and Evaluation**

Our college offers regular and vocational courses at undergraduate level. The admission of students in various courses is through a common entrance test. Before appearing to the final examination, student's performance is evaluated through monthly and sent-up test. Examination of practical papers is conducted at departmental level and is evaluated by external and internal examiners appointed by the University.

#### ❖ **Research and Development**

Apart from teaching, our college faculty members and students are encouraged to pursue and promote research activities in the college. The faculty members carry out their research work in frontiers areas of science, arts and literature. The college has well equipped laboratory facilities for doing research work. Also, the library facility with latest publication of books, journals, magazines is provided for supporting research activities in the college. Computing facilities with internet connection are also available in the college. The faculty members are granted duty leave for attending seminar, conference and workshop. B. N. College, Patna has its own research journals, Anveshika and Literary Pearls, in which articles of teachers and students are published. There is also a separate college magazine Anunad in which only students' articles are published.

#### ❖ **Library, ICT and physical infrastructure / instrumentation**

Our college has a well maintained central library as well as departmental library. The central library is easily accessible for the students of all subject streams. The library has spacious reading room, internet connections, digital books, magazines, free access to stacks, e-contents and research journals accessible through Information and Library Network (INFLIBNET). Our college also provides ICT facilities for strengthening the academic activities within the college. The college has a well equipped seminar hall with video conferencing facilities. New books are purchased for the library periodically to maintain the stocks. Feedback of students is also taken in order to update the library services.

Most of the departments of our college have their own computer labs. The college provides Wi-Fi facilities for students and teachers for promoting e-learning and research activities in the college. Our college has smart classrooms equipped with all the basic facilities such as interactive whiteboard, computer, laptop, projector, etc. The college have all the basic amenities for students such as separate toilets for girls and boys, safe drinking water, common room, bank, generator for power back up, ramp facilities for physically challenged students, a big playground with separate Volley-ball and Badminton courts. There is also a teachers' club in our college where teachers gather to discuss and share their ideas on various issues related to college. Also, the college has well maintained lecture halls for both theory and practical classes. There are separate invertors for many departments. Hostel facilities are also available in the college.

#### ❖ **Human Resource Management**

Human Resource Management of the college is monitored by the principal, several college committees and the student representatives. Regular meetings of different committees are held in order to sort out various problems related to students and staffs. The faculty members are encouraged to attend Orientation Programmes, Refresher Courses, and Workshops for their professional development. They are also allowed to avail duty leave for attending seminar, conference and workshop. Our college also arranges training programmes to their employee for skill development. The college organizes regular conference, seminar and workshop for knowledge sharing and to enhance the quality of their faculty members and students. Students are encouraged to join NCC and NSS of the college. These trained students help in various activities within

and outside the college campus. The college also provides the facilities of legal cell and career counselling.

#### ❖ **Faculty and Staff recruitment**

Permanent/Regular faculty and staff are recruited by the university after recommendation from concerned commissions and not by the college. However, guest teachers and temporary staffs are appointed by the college.

#### ❖ **Industry Interaction / Collaboration**

The college has collaborated with several industries for field visits, demonstrations, experiments, projects, and on the job training for the students. Professionals from industry are also invited in the college to deliver special lectures on various job-oriented topics for the benefit of students. These activities play a major role in shaping up the students career.

#### ❖ **Admission of Students**

Students in regular and vocational courses are admitted through common entrance test conducted by Patna University, Patna. To appear in this entrance test, first students have to fill up the online admission forms. After qualifying the entrance test, students are called for counselling based on their merit list. All the government norms regarding the admission process are strictly followed along with the reservation policy.

### **6.2.2 Implementation of e-governance in areas of operations:**

#### ❖ **Planning and Development**

There is some e-governance in planning and development.

#### ❖ **Administration**

There is some e-governance in administration.

#### ❖ **Finance and Accounts**

There is some e-governance in finance and accounts.

#### ❖ **Student Admission and Support**

Student admission is done through online process. Also, all the information related to students is uploaded on the college website.

#### ❖ **Examination**

Entrance test for all the regular and vocational courses is through online process.

### **6.3 Faculty Empowerment Strategies**

<p>* <b>Energy conservation:</b> The Institution makes continuous efforts to reduce the consumption of electricity by replacing the traditional bulbs and tubes with CFL and LED bulbs and tubes, and installation of efficient ceiling fans. The Institution avoids unnecessary use of power by switching off the electric gadgets just after the work is over. Guards and fourth grade employees are instructed to report immediately if any mismanagement occurs at any point in the institution. Presently the Institution is harvesting solar energy for solar hot water plant and in near future it will manage to harvest more solar energy to minimize the dependency on electricity. Well ventilated and well lighted class rooms and office to minimize dependency on electrical power supply and Gen- sets.</p> <p>* <b>Use of renewable energy</b> The Institution has a solar hot water plant for supply of hot water in different laboratories of Botany Department. The department has waste processing system (Vermin-culture) which generates manure for the plants and gardens in the campus.</p> <p>* <b>Water harvesting</b> The Institution has rain water harvesting facility, and using this system we store and use water for gardens.</p> <p>* <b>Efforts for Carbon neutrality:</b> The Institution has given strict instructions to all its departments to use refrigerators, air conditioners, blowers and other carbon emitting equipments in the permitted scale and point for appropriate duration to minimize the dependency on fossil's fuel.</p> <p>* <b>Plantation</b> The Institution regularly plants Ornamental, Medicinal and timber yielding plants in the space allotted for an eco-friendly environment, research and self dependency of the Institution for Timber. There are seven gardens in the campus for cool, calm and better academic environment.</p> <p>* <b>Hazardous waste management:</b> Heavy metal related compound wastes; chemicals released from laboratories are separately collected and disposed of in isolated condition. The institution also tries to maintain its campus plastic and tobacco free.</p> <p>* <b>e-waste management</b> The Institution manages the issue by contacting the distributors to take back our outdated electronic gadgets to be recycled or processed professionally. Institutional technicians are also helpful in e-waste management.</p> <p>* <b>Herbal Garden</b></p>		

Herbal garden with lot of medicinal plants to make it popular among the students to minimize their dependency on synthetic drugs that helps in promotion of indigenous knowledge.

## 7.2 Best Practices

Describe at least two institutional best practices

Upload details of two best practices successfully implemented by the institution as per NAAC format in your institution website, provide the link

### Best Practice-1

#### 1. Title of the Practice

Learn, Earn & Do Good

#### 2. Goal

All round development of students so that they can contribute to the strengthening of the nation.

#### 3. Context

Our college was established in 1889 with a view of instilling nationalist ideas among the students through quality higher education. With the passage of time lot of changes have occurred in our society and we can survive only when we keep ourselves up-to-date with the pace of the globe. New courses have been introduced without minimizing or ignoring the importance of the traditional courses. These days our college is an amalgam of tradition and modernity and is continuously upgrading the academic standards of our society by providing knowledge both in the traditional courses as well as modern subjects to cater to the needs of the society.

#### 4. The Practice

Under the leadership of the Principal, the faculty members, students, alumni, denizens of the society worked together to upgrade and modernize the college in order to improve academic excellence and employability of the students. As this college was established in 1889, being one of the oldest colleges of India, it has seen various vicissitudes in the flow of education. This college has succeeded in making the following items related to infrastructure:

- a. Beautifully structured building
- b. Classes are equipped with interactive smart board and projectors
- c. Audio – Visual seminar hall with interactive board
- d. Free high speed Wi – Fi broadband activity
- e. Well-equipped science laboratories
- f. INFLIBNET Facility
- g. Students who are economically and socially deprived are provided scholarships
- h. We have computers for students
- i. All departments have laptop and desktop computers, printers, scanners, copiers and intercom facility.
- j. We have air – conditioned Digital Language Lab with 20 computers, UGC Network Resource Centre with 17 computers, centralized computing facility with 20 computers and labs for science subjects with sufficient modern equipments.
- k. The college has NSS & NCC on the campus
- l. Our general library is regularly updated and now has around 78,000 books and a number of journals.

- m. The college has a fully furnished Health and Fitness Centre and spacious play ground and equipments for weightlifting, power lifting, and body building.
- n. Our administrative section is completely automated with networking and intranet
- o. We have purified drinking water facility in every nook and corner.
- p. We have fully furnished hostels and open air auditorium.
- q. We have received funding for the construction of new buildings and conference halls for different courses.
- r. We have formed cells like Career Guidance and Placement Cell, Scholarship cell, Equal Opportunity cell, Centre for Distance Education, Student welfare Cell besides sports club, cultural and fine arts club and staff club.

s. We have a professional still camera and a movie camera which are used for documentation.

The college is keen in providing all these services to the students for developing employability and academic excellence. Faculty members monitor the proper use of all services, and most of the maintenance of the services is done by a team consisting of the teachers and the students. These infrastructural facilities are crucial to the exposure received by our students, and the college offers these services to the distance education students as and when required. We have also proposed for funding to acquire additional infrastructure to compete with international campuses.

### **5. Evidence of Success**

Infrastructural upgradation has ensured academic excellence and employability of our students in the recent years. The following are a few of the instances:

- (i) Late Lal Narayan Sharma 1<sup>st</sup> Attorney General of India was a student of this college.
- (ii) Our former students have led Bihar and Indian politics for a long time. They are Lalu Prasad Yadav, Sushil Kumar Modi and many others.
- (iii) Our students have been representing the university teams in various sports/fine Arts/Elocution Competitions for the last many years. They have proved themselves in weightlifting, power lifting and body building at the state level. Our college occupies top position in sports in terms of the number of our students and their achievements.

### **6. Problems Encountered and Resources Required**

The college faces a few problems in the effective utilization of our infrastructural resources as detailed below:

- (i) We are not provided with sufficient funds for infrastructural mobilization as per the proposals submitted, and it slows down the pace of our development.
- (ii) We occasionally face scarcity of permanent faculty members.
- (iii) Our major deficiency is that we do not have qualified technical assistants and mechanics for the operation and maintenance of the available resources. Our requests for the sanction of posts are yet to be considered by the government.

### **7. Notes**

Any institution planning to upgrade its infrastructural resources should take in to consideration the locale of the institution, the nature of representation of the communities the students hail from, and the academic requirements of the institution. There should be efforts to bring parity in terms of standards of international institutions. The facilities should be accessible to the students so that their academic excellence and employability are enhanced.

## Best Practice- 2

### 1. Title of the Practice

Preservation of Human Values with Modern Learning

### 2. Goal

The college aims to produce such students who after acquiring knowledge and skill are to enter public life with efficiency, sincerity, morality and honesty. To earn money is not bad but to earn money setting aside all norms of morality and honesty is very bad. And this lesson we do not impart only in theory but in practice. First of all we stand the test and keep the ideal so that there may not be a crisis of faith. In this blind race of materialism, commercialism, consumerism, and professionalism we give practical education to give, control and sympathise because without these qualities even an educated man will become worse than wild beasts. The demand of the hour is that we should think of the making of nation first and with this motto only, our college was established **o;a jk"V<sup>a</sup>s tkx`;ke** (we keep ourselves awake for the nation). And in achieving our goal we put thrust on those human values although we provide them latest courses of study.

### 3. The Context

Since our college was established in 1889 in order to provide education to those students who were filled with nationalist ideas and were not allowed to study in government colleges, the service to the nation is our main purpose. We want to rebuild our nation with the people with high moral ideas and culture as well as with scientific and progressive thoughts.

### 4. The Practice

We are not profit makers rather we want to use our knowledge, skill, efficiency in the rebuilding of the nation. For this, latest techniques such as e-learning and e-administration are essential. For students we have provided Wi-Fi facility, Language Lab with twenty computers, e-Library so that they can have access to the best universities and institutes of the world. Our students have always been the leaders in every field and we want to maintain that pace so we have also paid attention to e-administration. e-administration is being implemented in gradual manner. Management & Information System (MIS) Software was specially designed to cover the various administrative and financial tasks of the college as

per the need of the day. Admission, pay roll, fee collection and accounting reports generation were implemented in the first stage. Staff working in these sections were motivated and trained with some incentives. Now, these sections are fully computerized and managed by a small number of clerical staff. In the second stage, Central Library has been linked to the Server with special designed software which controls accession of books, cataloguing, issue & return of book and finally generates no dues report to each and every student. As per scheme, the process of bar-coding of all the books is to be undertaken very soon. Our college has also implemented networking of all the departments and sections through Wi-Fi. Next stage is to implement inter- connectivity among all the departments, office and library for fast communication and transfer of information. However, it needs re-orientation of staff, students and faculty members with short-term training to handle software.

5. **Evidence of Success**

Implementation of e-administration has eased the work of selection of candidates for admission. We conduct written test for the admission to B.A./ B.Sc./ Vocational Courses. The data is put on computers and it becomes easier to publish the list within no time. Results are also uploaded on Internet. In this way the admission process is transparent. Fee collection and timely deposit of cash have been ensured. Daily accounts register and other reports are automatically generated. Salary report is generated without error in time. Repetitive generation of various types of report demanded by the University, State Government, Central Government and other agencies are prepared with ease. This has helped the college administration. Despite shortage of clerical staff in comparison to huge structure and diversity of jobs, administration and governance has become effective through e-administration. It is to be mentioned that the success story of e-administration in B.N. College has prompted other institutions also to go for computerization.

6. **Problems Encountered and Resources Required**

The first and foremost problem was the re-orientation of the mindset of staff who were accustomed to old practice. Second challenge was to make them ready for training to handle the MIS Software. One strategical problem was to check error during transaction in different activities of staff. The college implemented e-administration in stages. In the first stage, important transactions are preserved manually also. To overcome any error during handling of the new software, a professional from the software company has also been hired to assist and train our staff. As a matter of fact, any software specially designed needs regular improvements to meet the requirements of end users. As such, one major task is to minutely study and monitor the functioning and report generation process of the software. This task has been effectively handled by Accountant, who is well conversant with statutory needs and software functioning. However, the software company is contacted as and when required to customize programming as per our needs.

7. **Notes (Optional)**

As it always happens with the introduction of new ideas and new technologies that people who are accustomed to working in the traditional way, do not accept them easily and also do not want to learn new things but when they are made to understand the importance of those technologies, they adopt them quite willingly. This happened with our staff and now they are efficiently performing their job.
